Ideation Phase

Define the Problem Statements

Team ID	PNT2022TMID43051
Project name	Skill/Job Recommender Application

Problem Statement:

Having lots of skills but wondering which job will best suit you? Don't need to worry! We have come up with a skill recommender solution through which the fresher or the skilled person can log in and find the jobs by using the search option or they can directly interact with the chatbot and get their dream job.

To develop an end-to-end web application capable of displaying the current job openings based on the user skillset. The user and their information are stored in the Database. An alert is sent when there is an opening based on the user skillset. Users will interact with the chatbot and can get the recommendations based on their skills. We can use a job search API to get the current job openings in the market which will fetch the data directly from the webpage.

I am	Describe customer with 3-4 key characteristics - who are they?	Job Seeker / Job Recruiter
I'm trying to	List their outcome or "job" the care about - what are they trying to achieve?	Find a job / Post to job
but	Describe what problems or barriers stand in the way – what bothers them most?	I am unable to get a job / I am unable to hire a right person
because	Enter the "root cause" of why the problem or barrier exists – what needs to be solved?	Lack of current updates of job availability / -
which makes me feel	Describe the emotions from the customer's point of view – how does it impact them emotionally?	Frustated / Frustated

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Graduate	Get a job	I am unaware of opportunities available	I don't have correct guidance	Inferior to others
PS-2	A Job seeker	Find alternate job with more benefits	I am unable to get the information about the job I expect	I am unaware of current updates of jobs I seek for	Stressed
